Database

SQL | MongoDB

ADDITIONAL INFORMATION

CREATIVE WORKS

30/05/2022 – 30/05/2022
hackathon- Google Cloud (DEVOTEAM) Create an MVP with Google Cloud with a renewable energy theme. The idea of the project was to develop a solution to help choose the best energy in relation to its location. I was in the front-end of the application where I developed a landing page, a registration form, login with JWT authentication and the system interface where it was divided into a dashboard and energy performance. Technologies used: ReactJS, Javascript and CSS

11/04/2022 – 07/06/2022
ERP system for small businesses Management system for companies. Register, delete and edit: employees and products. Track in real time: your sales, your products in stock, your revenue and your current profit. Using a graph, check which product sells the most. Technologies used: ReactJS, Javascript, CSS, NodeJS (Express), MongoDB.
