CREATIVE WORKS

[30/05/2022 – 30/05/2022]

hackathon- Google Cloud (DEVOTEAM)

Create an MVP with Google Cloud with a renewable energy theme.

The idea of the project was to develop a solution to help choose the best energy in relation to its location.

I was in the front-end of the application where I developed a landing page, a registration form, login with JWT authentication and the system interface where it was divided into a dashboard and energy performance.

Technologies used: ReactJS, Javascript and CSS

[11/04/2022 – 07/06/2022]

ERP system for small businesses

Management system for companies.

Register, delete and edit: employees and products.

Track in real time: your sales, your products in stock, your revenue and your current profit.

Using a graph, check which product sells the most.

Technologies used: ReactJS, Javascript, CSS, NodeJS (Express), MongoDB.
