WORK EXPERIENCE

26/06/2023 – 04/09/2023 Portugal
WEB DEVELOPMENT INTERN WIG - WORK IS GOOD (WIG)

I have developed projects primarily using Blazor technology (C#), working on both the backend and front end of a web application. This involved creating internal APIs and extracting data from external APIs. I focused on enhancing application security by implementing authentication systems using JWT and bcrypt.
I have experience working in teams, adhering to code management principles with Git.
For example, I contributed to the development of a Software-as-a-service platform for feedback on an existing website.
